## TWO UM PROFESSORS TO LECTURE MONDAY

### MISSOULA

Two University of Montana faculty members---Dr. E. W. Pfeiffer, a zoology professor, and Dr. H. Duane Hampton, an associate professor of history---will be featured in separate lecture programs Monday (Oct. 5) at U. M.

Dr. Pfeiffer will present a seminar entitled "Biomedical Sciences in North Vietnam" in room 207 of the Health Sciences Building at noon Monday.

Slides made by Dr. Pfeiffer during a June 1970 tour of the Republic of North Vietnam will be shown during the seminar.

Dr. Pfeiffer has published much of his research on the ecological effects of the large-scale military use of chemical herbicides. His paper, "The Effects of War on the Ecology of Vietnam," appeared recently in a special issue of "Chuong Viet," a journal of the Vietnamese Catholic Students' in America.

He has also completed, along with three colleagues, a "Report on the Herbicidal Damage by the U. S. in Southeastern Cambodia," which appeared in a book entitled "Defoliation," published by Ballantine Books, Inc.

Dr. Hampton will discuss "Preservation or Utilization? Man's Attitudes Toward Land," at 7:30 p.m. Monday in room 215 of the Women's Center.

Dr. Hampton is the first lecturer in a 10-week series sponsored by the Western Montana Scientists' Committee for Public Information, under a National Science Foundation grant. His lecture will cover various aspects of environmental problems.

Both of Monday's programs are ~~open~~ to the public without charge.
